The University of Vermont is grateful that you took the time to introduce us to your product, the very idea of our staff and students being in a chemical free environment is something we didn't think possible.

Thank-you for introducing the Lotus Pro to our campus and training our staff with your chemical-free program. Since we started we can already see the improvements through out the campus.

I will admit I was skeptical in the beginning , but now, I am a believer in the cleaning and sanitizing power of the Lotus Pro and the results we've seen are nothing short of amazing.

We are impressed with the product and we are hoping to expand its uses.

Best regards,

Rob Prim
